

Driving technology through quality equipment.

OUR PROCESS IS PRECISE AND PROVEN

LEL Semi is committed to providing quality pre-owned PCB assembly and semiconductor fab equipment. What sets us apart? Our team makes decisions with you in mind, and we value honest and open communication from the start. We know you're needing equipment now, and we can move quickly with little to no lead time because we stock an inventory, pay upfront, and purchase everything from single units to full facilities.

LET US HELP WITH ALL EQUIPMENT NEEDS – BUYING & SELLING

We primarily work with PCB/SMT assembly, semiconductor fabrication, and analysis equipment. If we don't have what you're looking for in our inventory, let our team source for you through our large network of equipment partners. We want to make this process a great experience for you. Our team is ALWAYS looking to purchase and remove any equipment your facility may have coming offline, sitting idle, or for parts. Not sure if we deal with the type of equipment you have for sale? Send it over. We're always happy to look at expanding our inventory.

EQUIPMENT WHEN YOU NEED IT

Our team has decades of experience in buying, selling, decommissioning, and shipping equipment. We work with budgets of all sizes, to ensure that you have the equipment you need when you need it to keep your company successful.
